

Help Needed!

Can you help restore the school gazebo into a cosy outdoor quiet area?

We're looking to restore the wooden gazebo in the school grounds and turn it into a cosy quiet space / outdoor learning area for the children.

The plan is to make it properly weatherproof so it can be used all year round, likely including:

- repairing and waterproofing the roof (possibly with EPDM rubber roofing)
- adding clear flexible "windows" around the sides
- possibly fitting simple doors
- some basic interior improvements (benches, storage, etc.)

Do we have any parents who are handy, or might know someone with skills to help?

Carpentry

Roofing

Minor building work

General advice

We're not expecting free labour (although it would be nice!). We'd just really value recommendations or someone who might be happy to look at the gazebo and advise or quote for the work. If that's you please get in touch!

Thank you!
